

## MOVIA-E LED Beacon 1020653001

### Summary

The appearance is designed in such a way that even if the vehicle is tilted (wrong appearance) of up to +/-10° due to the angle of inclination of the vehicle, the required light values of 42 cd for 0° are maintained. The use of pluggable Long Life flash tubes (light source module MD E1 002252) make the Movia E particularly easy to maintain. The Movia E is tailored to areas of application that require a particularly small, powerful indicator lamp.

### Benefits

- > Fixed Mounting ISO 4148 Type B1
- > Sealed to keep out dirt and moisture
- > Protect against shock and vibration
  
- > FRESNEL Technologie
  
- > UL-listed

### Specifications

- > Operation Voltage: 12VDC
- > Rated Current: 2,0A
- > Power: 24W
  
- > Flashing frequency: 2,0 Hz
  
- > Weight: 3 kg
